Subject: Laboratory Report
Project: JPL

Enclosed is the Laboratory report for samples received on 06/07/05. The data reported include :

Sample ID	Control #	Col Date	Matrix	Analysis
MW1	F064-01	06/05/05	WATER	ANIONS BY IC
				FERROUS IRON
				PERCHLORATE BY IC
				METALS IN WATER & WASTE
				TOTAL ORGANIC CARBON
				DISSOLVED ORGANIC CARBON
				SOLIDS TOTAL DISSOLVED
				SULFIDE
				AMMONIA-N
				SPECIFIC CONDUCTANCE
				ALKALINITY
				TKN

The results are summarized on the following pages.

Please feel free to call if you have any questions concerning these results.

Sincerely yours,

Kam Y. Pang, Ph.D.

Subject: RE: Review Login Sheet SDG: 05F064 (Battelle/JPL)

Hi Hanh,

Based on recent discussions, we have reverted to our original list of analytes for MW-1. If you wouldn't mind, could we get the list of analytes below analyzed? The analytes below should be the same as the original COC for MW-1 to you.

(1) DOC, TOC, Ferrous Iron, Sulfide, Anion (Nitrite), Metals (Iron, Sodium), Perchlorate, Ammonia, TKN, Specific Electrical Conductance
(2) TDS, Alkalinity, Anions (Nitrate, Sulfate, Chloride), Metals (Calcium, Potassium, Magnesium).

I can send the original COC to you or the original login sheet if you need.

Sorry for the trouble. Please give me a call if you have any questions or need any clarification.

Best Regards,

Tien

Hanh,

1002

After discussing the list of analytes, I need to make a correction on the analytes requested for MW-1. The analytes we need analyzed and should keep are:

(1) DOC, TOC, Ferrous Iron, Sulfide, Anion (Nitrite), Metals (Iron, Sodium), Perchlorate, Ammonia, TKN, Specific Electrical Conductance

The analytes which we do not need analyzed and should be taken out of Battelle's COC and your login sheet are:

(2) TDS, Alkalinity, Anions (Nitrate, Sulfate, Chloride), Metals (Calcium, Potassium, Magnesium)

I hope this doesn't cause any problems and thanks for your help. Please let me know if you have any questions.

Thanks,
Tien

Hanh Bui

Subject: RE: Review Login Sheet SDG: 05F064 (Battelle/JPL)

Hi Tien,
Yes, besides Perchlorate 24 hour, the other analysis is 14 days TAT. PQL is the same as RL (reporting limit) which is usually 3 to 10 times MDL, thanks.
Hanh

Subject: RE: Review Login Sheet SDG: 05F064 (Battelle/JPL)

Hanh,

The login sheet for MW-1 looks good. All the analytes we requested are accounted for. The login review sheet for Garfield, Sunset, Bangham, LFWC-2, and LAWC-3 also look good. I wanted to double check the turnaround time (TAT). Besides perchlorate, is the TAT for the results of all other analytes 14 days? Also, what is the difference between MDL (Method Detection Limit) and PQL (Practical Quantitization Limit)?

Thanks,
Tien

Hi Tien,
Thanks for your information, enclosed COC and review Login sheet for samples we received on June/7. For Anions 300 (Cl/ NO3, NO2, SO4), Metals 200-7 included Ca, Fe, Mg, K, and Na. Please review that, thanks.
Hanh

Subject: EMAX Chain of Custody

Hanh,

Thanks for faxing the chain of custodies and the EMAX laboratories review sheet. So far everything looks good at my end. However I want to double check something. Can you tell me which metals are included in the analysis "Metals in Water and Waste" and which analytes are included in "Anions" by IC?

Below is my contact information.

Best Regards,

Tien Shiao

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL.
N		Indicates presumptive evidence of a compound.
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level.
E	J	Indicates that the result is above the maximum calibration range.
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05F064**

METHOD 200.7
METALS BY ICP-AES

One (1) water sample was received on 06/07/05 for Metals analysis by Method 200.7 in accordance with "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods", SW846, 3rd edition.

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Serial Dilution / Post-Analytical Spike

Sample F027-01 from another SDG was analyzed for serial dilution and post-analytical spike. All QC requirements were met.

5. Matrix Spike/Matrix Spike Duplicate

MS/MSD sample was not designated in this SDG.

6. Sample Analysis

Sample was analyzed according to the prescribed QC procedure. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05F064**

METHOD 310.1
TOTAL ALKALINITY

One (1) water sample was received on 06/07/05 for Total Alkalinity analysis by Method 310.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

Duplicate sample was not designated in this SDG.

5. Sample Analysis

Sample was analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05F064**

METHOD 350.2
AMMONIA (NH3-N)

One (1) water sample was received on 06/07/05 for Ammonia analysis by Method 350.2 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

No duplicate sample was designated in this SDG.

5. Matrix Spike

No MS sample was designated in this SDG.

6. Sample Analysis

Sample was analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05F064**

METHOD 314.0
PERCHLORATE

One (1) water sample was received on 06/07/05 for Perchlorate analysis by Method 314.0 in accordance with "Method for Determination of Perchlorate by Ion Chromatography", EPA 600/98-118.

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at half of the method reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control sample results were within QC limits.

4. Duplicate

No Duplicate sample was designated in this SDG.

5. Matrix Spike

No MS sample was designated in this SDG.

6. Sample Analysis

Sample was analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05F064**

METHOD 376.1
SULFIDE

One (1) water sample was received on 06/07/05 for Sulfide analysis by Method 376.1 in accordance with "Methods for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

No duplicate sample was designated in this SDG.

5. Sample Analysis

Sample was analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05F064**

METHOD 160.1
TOTAL DISSOLVED SOLIDS

One (1) water sample was received on 06/07/05 for Total Dissolved Solids analysis by Method 160.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

No duplicate sample was designated in this SDG.

5. Sample Analysis

Sample was analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05F064**

METHOD 415.1
DISSOLVED ORGANIC CARBON

One (1) water sample was received on 06/07/05 for Dissolved Organic Carbon analysis by Method 415.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

No duplicate sample was designated in this SDG.

5. Matrix Spike

No MS sample was designated in this SDG.

6. Sample Analysis

Sample was analyzed according to the prescribed QC procedures. All criteria were met.

It was noticed that result of Dissolved Organic Carbon was higher than Total Organic Carbon. The sample was analyzed according to bottle label.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05F064**

METHOD 415.1
TOTAL ORGANIC CARBON

One (1) water sample was received on 06/07/05 for Total Organic Carbon analysis by Method 415.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. **Holding Time**

   Analysis met holding time criteria.

2. **Method Blank**

   Method blank was free of contamination at the reporting limit.

3. **Lab Control Sample/Lab Control Sample Duplicate**

   Lab control results were within QC limit.

4. **Duplicate**

   No duplicate sample was designated in this SDG.

5. **Matrix Spike**

   No MS sample was designated in this SDG.

6. **Sample Analysis**

   Sample was analyzed according to the prescribed QC procedures. All criteria were met.

   It was noticed that result of Total Organic Carbon was lower than Dissolved Organic Carbon. The sample was analyzed according to bottle label.

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL.
N		Indicates presumptive evidence of a compound.
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level.
E	J	Indicates that the result is above the maximum calibration range.
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05F027**

METHOD 200.7
METALS BY ICP-AES

Five (5) water samples were received on 06/02/05 and 06/03/05 for Metals analysis by Method 200.7 in accordance with "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods", SW846, 3rd edition.

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blanks were free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Serial Dilution / Post-Analytical Spike

Sample F027-01 was analyzed for serial dilution and post-analytical spike. All QC requirements were met.

5. Matrix Spike/Matrix Spike Duplicate

MS/MSD sample was not designated in this SDG.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedure. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05F027**

METHOD 120.1
SPECIFIC CONDUCTIVITY

Five (5) water samples were received on 06/02/05 and 06/03/05 for Specific Conductivity analysis by Method 120.1 in accordance with "Methods for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

3. Duplicate

No duplicate sample was designated in this SDG.

4. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05F027**

METHOD 300.0
ANIONS

Five (5) water samples were received on 06/02/05 and 06/03/05 for Chloride, Nitrate-N, Nitrite-N and Sulfate analyses by method 300.0 in accordance with "Method for Determination of Inorganic Anions by Ion Chromatography", EPA 600/84-017.

1. Holding Time

Analyses met holding time criteria.

2. Method Blank

Method blanks were free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limits.

4. Duplicate

No duplicate sample was designated in this SDG.

5. Matrix Spike

No MS sample was designated in this SDG.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05F027**

METHOD 310.1
TOTAL ALKALINITY

Five (5) water samples were received on 06/02/05 and 06/03/05 for Total Alkalinity analysis by Method 310.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blanks were free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

Duplicate sample was not designated in this SDG.

5. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05F027**

METHOD 350.2
AMMONIA (NH3-N)

Five (5) water samples were received on 06/02/05 and 06/03/05 for Ammonia analysis by Method 350.2 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

Duplicate sample was not designated in this SDG.

5. Matrix Spike

MS sample was not designated in this SDG.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05F027**

METHOD 314.0
PERCHLORATE

Five (5) water samples were received on 06/02/05 and 06/03/05 for Perchlorate analysis by Method 314.0 in accordance with "Method for Determination of Perchlorate by Ion Chromatography", EPA 600/98-118.

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at half the method reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control sample results were within QC limits.

4. Duplicate

Sample F041-02 was analyzed for Duplicate. % RPD was within QC limit.

5. Matrix Spike

Sample F041-02 was spiked. % Recovery was within QC limit.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05F027**

SM3500
FERROUS IRON

Five (5) water samples were received on 06/02/05 and 06/03/05 for Ferrous Iron analysis by Method SM3500 in accordance with "Standard Methods for the Examination of Water and Wastewater", 18th edition (1990).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blanks were free of contamination at the reporting limit.

3. Lab Control Sample

Lab control results were within QC limit.

4. Duplicate

Samples F027-01 and F041-01 were analyzed for duplicate. %RPDs were within QC limit.

5. Matrix Spike/Matrix Spike Duplicate

Samples F027-01 and F041-01 were spiked. %Recoveries were within QC limit.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05F027**

METHOD 376.1
SULFIDE

Five (5) water samples were received on 06/02/05 and 06/03/05 for Sulfide analysis by Method 376.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

Sample F041-02 was analyzed for duplicate. %RPD was within QC limit.

5. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05F027**

METHOD 415.1
DISSOLVED ORGANIC CARBON

Five (5) water samples were received on 06/02/05 and 06/03/05 for Dissolved Organic Carbon analysis by Method 415.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. **Holding Time**

   Analysis met holding time criteria.

2. **Method Blank**

   Method blank was free of contamination at the reporting limit.

3. **Lab Control Sample/Lab Control Sample Duplicate**

   Lab control results were within QC limit.

4. **Duplicate**

   Sample F041-02 was analyzed for Duplicate. % RPD was within QC limit.

5. **Matrix Spike**

   Sample F041-02 was spiked. % Recovery was within QC limit.

6. **Sample Analysis**

   Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05F027**

METHOD 415.1
TOTAL ORGANIC CARBON

Five (5) water samples were received on 06/02/05 and 06/03/05 for Total Organic Carbon analysis by Method 415.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. **Holding Time**

   Analysis met holding time criteria.

2. **Method Blank**

   Method blank was free of contamination at the reporting limit.

3. **Lab Control Sample/Lab Control Sample Duplicate**

   Lab control results were within QC limit.

4. **Duplicate**

   Sample F041-02 was analyzed for Duplicate. % RPD was within QC limit.

5. **Matrix Spike**

   Sample F041-02 was spiked. % Recovery was within QC limit.

6. **Sample Analysis**

   Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05H132**

METHOD 310.1
TOTAL ALKALINITY

Five (5) water samples were received on 08/16/05 for Total Alkalinity analysis by Method 310.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

Sample H132-05 was analyzed for duplicate. %RPD was within QC limit.

5. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05H132**

METHOD 300.0
ANIONS

Five (5) water samples were received on 08/16/05 for Chloride, Nitrate-N, Nitrite-N and Sulfate analyses by method 300.0 in accordance with "Method for Determination of Inorganic Anions by Ion Chromatography", EPA 600/84-017.

1. Holding Time

Analyses met holding time criteria.

2. Method Blank

Method blanks were free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limits.

4. Duplicate

No duplicate sample was designated in this SDG.

5. Matrix Spike

No MS sample was designated in this SDG.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

Nitrate-N and Nitrite-N results were reported as Nitrogen concentration.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05H132**

METHOD 120.1
SPECIFIC CONDUCTIVITY

Five (5) water samples were received on 08/16/05 for Specific Conductivity analysis by Method 120.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

3. Duplicate

Duplicate sample was not designated in this SDG.

4. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05H132**

METHOD SM3500
FERROUS IRON

Five (5) water samples were received on 08/16/05 for Ferrous Iron analysis by Method SM3500 in accordance with "Standard Methods for the Examination of Water and Wastewater", 18th edition (1990).

1. **Holding Time**

   Analysis met holding time criteria.

2. **Method Blank**

   Method blank was free of contamination at the reporting limit.

3. **Lab Control Sample**

   Lab control result was within QC limit.

4. **Duplicate**

   Sample H132-05 was analyzed for duplicate. %RPD was within QC limit.

5. **Sample Analysis**

   Samples were analyzed according to the prescribed QC procedures. All criteria were met.

METHOD 160.1
TOTAL DISSOLVED SOLIDS

Five (5) water samples were received on 08/16/05 for Total Dissolved Solids analysis by Method 160.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

Duplicate sample was not designated in this SDG.

5. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

ANALYTICAL BATCH # SS TD H012W S

Standard	
LCS ID	SW7A-06-146
LCSTV(mg/L)	336

Balance ID:	
40706360	✓
37030058	

Comments:
* Turbid filtrate, brown & black residue after drying

Analyzed By: NB/AC

$R_{(mg/L)} = \frac{(DS - DW) \times 1000}{S}$

where: $R_{(mg/L)}$ = concentration of solids; $DS_{(mg)}$ = Dry weight of Dish + Solids; $DW_{(mg)}$ = Dish weight; $S_{(ml)}$ = sample amount

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05H132**

METHOD 351.3
TKN

Five (5) water samples were received on 08/16/05 for TKN analysis by Method 351.3 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. **Holding Time**

   Analysis met holding time criteria.

2. **Method Blank**

   Method blank was free of contamination at the reporting limit.

3. **Lab Control Sample/Lab Control Sample Duplicate**

   Lab control results were within QC limit.

4. **Duplicate**

   Sample H132-05 was analyzed for duplicate. %RPD was within QC limit.

5. **Matrix Spike**

   Sample H132-05 was spiked. Recovery was within QC limit.

6. **Sample Analysis**

   Samples were analyzed according to the prescribed QC procedures. All criteria were met.

   All results were reported as Nitrogen concentration.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05H132**

METHOD 415.1
DISSOLVED ORGANIC CARBON

Five (5) water samples were received on 08/16/05 for Dissolved Organic Carbon analysis by Method SW9060 in accordance with "Test Methods for Evaluating Solid Waste, Physical/Chemical Method", SW846, 3rd edition.

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

No Duplicate sample was designated in this SDG.

5. Matrix Spike

No MS sample was designated in this SDG.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

Hanh Bui

From: Shiao, Tien [shiaoh@BATTELLE.ORG]
Sent: Tuesday, August 16, 2005 1:25 PM
To: Hanh Bui
Cc: Conner, David J
Subject: RE: COC for samples receive 8/16 SDG: 05H132 (Battelle/JPL)

Hanh,

You're right. Instead of two sulfides, there should be one sulfide and one sulfate on the COC. Please change the COC accordingly and thanks for checking.

Also, please let me know when we will be receiving the results for MW-21 (Screens 1 through 5 + duplicate) (samples were collected on 07/26) and MW-20 (Screens 1 through 5) (samples were collected on 08/01). With a 14 day TAT, we should receive the results any day now.

Thanks,
Tien

Subject: COC for samples receive 8/16 SDG: 05H132 (Battelle/JPL)

Hi Tien,
Just confirm with you that COC indicated sulfide twice. I think Anions included sulfate/nitrate/nitrite/chloride.
Thanks
Hanh

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL.
N		Indicates presumptive evidence of a compound.
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level.
E	J	Indicates that the result is above the maximum calibration range.
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise.

LABORATORY REPORT FOR

BATTELLE MEMORIAL INSTITUTE

JPL

METHOD 200.7
METALS BY ICP-AES

SDG#: 05H132

7000

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05H132**

METHOD 200.7
METALS BY ICP-AES

Five (5) water samples were received on 08/16/05 for Metals analysis by Method 200.7 in accordance with "Methods for Chemical Analysis of Water and Wastes", EPA 600/R-94-111-May 1994.

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Serial Dilution / Post-Analytical Spike

Sample H132-01 was analyzed for serial dilution and post-analytical spike. All QC requirements were met.

5. Matrix Spike/Matrix Spike Duplicate

No MS/MSD sample was designated in this SDG.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

From: Shiao, Tien [shiaoh@BATTELLE.ORG]
Sent: Wednesday, August 24, 2005 11:33 AM
To: Hanh Bui
Cc: Ohart, Carolyn J
Subject: FW: COC SDG: 05H213 (Battelle/JPL)

Hi Hanh,

I reviewed the COCs and they look correct. And yes, nitrate will be the only parameter re-sampled for MW-25.

Sorry for the late reply.

Thanks,
Tien

Hi Tien,
Here is the COC for samples receive today, Nitrate only for MW-25 samples? thanks.
Hanh

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL.
N		Indicates presumptive evidence of a compound.
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level.
E	J	Indicates that the result is above the maximum calibration range.
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05H213**

METHOD 200.7
METALS BY ICP-AES

One (1) water sample was received on 08/23/05 for Metals analysis by Method 200.7 in accordance with "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods", SW846, 3rd edition.

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Serial Dilution / Post-Analytical Spike

Sample H213-01 was analyzed for serial dilution and post-analytical spike. All QC requirements were met.

5. Matrix Spike/Matrix Spike Duplicate

No MS/MSD sample was designated in this SDG.

6. Sample Analysis

Sample was analyzed according to the prescribed QC procedures. All criteria were met.

LABORATORY REPORT FOR

BATTELLE MEMORIAL INSTITUTE

JPL

WET CHEMICAL ANALYSES

SDG#: 05H213

8600

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05H213**

METHOD 300.0
NITRATE-N AND NITRITE-N

Eleven (11) water for Nitrate-N and six (6) water samples for Nitrite-N were received on 08/23/05 to be analyzed by method 300.0 in accordance with "Method for Determination of Inorganic Anions by Ion Chromatography", EPA 600/84-017.

1. Holding Time

Analyses met holding time criteria except dilution runs of H213-06 and -07 for Nitrate-N analysis.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limits.

4. Duplicate

No duplicate sample was designated in this SDG.

5. Matrix Spike

No MS sample was designated in this SDG.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met with the aforementioned exception.

Nitrate-N analysis in the initial runs of samples H213-06 and -07 were within 48-hours holding time criteria. The samples were reanalyzed at DF 5 due to exceeded calibration range in the initial runs, however, the dilution runs were approximately analyzed two-hour out of 48-hour holding time criteria. Both initial and dilution results were reported.

All results were reported as Nitrogen concentration.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05H213**

METHOD 160.1
TOTAL DISSOLVED SOLIDS

Six (6) water samples were received on 08/23/05 for Total Dissolved Solids analysis by Method 160.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

No duplicate sample was designated in this SDG.

5. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

From: Shiao, Tien [shiaoh@BATTELLE.ORG]
Sent: Wednesday, August 24, 2005 11:33 AM
To: Hanh Bui
Cc: Ohart, Carolyn J
Subject: FW: COC SDG: 05H213 (Battelle/JPL)

Hi Hanh,

I reviewed the COCs and they look correct. And yes, nitrate will be the only parameter re-sampled for MW-25.

Sorry for the late reply.

Thanks,
Tien

Hi Tien,
Here is the COC for samples receive today, Nitrate only for MW-25 samples? thanks.
Hanh

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL.
N		Indicates presumptive evidence of a compound.
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level.
E	J	Indicates that the result is above the maximum calibration range.
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05H213**

METHOD 200.7
METALS BY ICP-AES

One (1) water sample was received on 08/23/05 for Metals analysis by Method 200.7 in accordance with "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods", SW846, 3rd edition.

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Serial Dilution / Post-Analytical Spike

Sample H213-01 was analyzed for serial dilution and post-analytical spike. All QC requirements were met.

5. Matrix Spike/Matrix Spike Duplicate

No MS/MSD sample was designated in this SDG.

6. Sample Analysis

Sample was analyzed according to the prescribed QC procedures. All criteria were met.

LABORATORY REPORT FOR

BATTELLE MEMORIAL INSTITUTE

JPL

WET CHEMICAL ANALYSES

SDG#: 05H213

8000

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05H213**

METHOD 300.0
NITRATE-N AND NITRITE-N

Eleven (11) water for Nitrate-N and six (6) water samples for Nitrite-N were received on 08/23/05 to be analyzed by method 300.0 in accordance with "Method for Determination of Inorganic Anions by Ion Chromatography", EPA 600/84-017.

1. Holding Time

Analyses met holding time criteria except dilution runs of H213-06 and -07 for Nitrate-N analysis.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limits.

4. Duplicate

No duplicate sample was designated in this SDG.

5. Matrix Spike

No MS sample was designated in this SDG.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met with the aforementioned exception.

Nitrate-N analysis in the initial runs of samples H213-06 and -07 were within 48-hours holding time criteria. The samples were reanalyzed at DF 5 due to exceeded calibration range in the initial runs, however, the dilution runs were approximately analyzed two-hour out of 48-hour holding time criteria. Both initial and dilution results were reported.

All results were reported as Nitrogen concentration.

SAMPLE RESULTS

METHOD 300.0
NITRATE-N

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05H213**

METHOD 160.1
TOTAL DISSOLVED SOLIDS

Six (6) water samples were received on 08/23/05 for Total Dissolved Solids analysis by Method 160.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

No duplicate sample was designated in this SDG.

5. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

PROJECT: **JPL**

SDG: **05H213**

METHOD 376.1
SULFIDE

Six (6) water samples were received on 08/23/05 for Sulfide analysis by Method 376.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample

Lab control result was within QC limit.

4. Duplicate

Sample H213-12 was analyzed for duplicate. %RPD was within QC limit.

5. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL.
N		Indicates presumptive evidence of a compound.
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level.
E	J	Indicates that the result is above the maximum calibration range.
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05H231**

METHOD 300.0
NITRATE-N

Five (5) water samples were received on 08/24/05 for Nitrate-N analysis by method 300.0 in accordance with "Method for Determination of Inorganic Anions by Ion Chromatography", EPA 600/84-017.

1. Holding Time

Analysis met holding time criteria except samples H231-03 and 04 were analyzed at 13 minutes and 12 minutes out of 48-hour holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limits.

4. Duplicate

No duplicate sample was designated in this SDG.

5. Matrix Spike

No MS sample was designated in this SDG.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met except as aforementioned.

Results were reported as nitrogen concentration.

Subject: RE: COC for samples received on 7/26 SDG: 05G218 (Battelle/JPL)

Hi Hanh,

The COC for MW-24 looks good. You're correct that we're not analyzing any perchlorate at EMAX.

I see a note on the "sample receipt form" that says perchlorate was requested on label but not on COC. Please go with the COC and not the sample labels. Sorry about the confusion.

Thanks,
Tien

Subject: COC for samples received on 7/26 SDG: 05G218 (Battelle/JPL)

Hi Tien,
Enclosed the COC for sample received on 7/26. I think all samples for Perchlorate you sent to APC labs. Thanks
Hanh

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL.
N		Indicates presumptive evidence of a compound.
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level.
E	J	Indicates that the result is above the maximum calibration range.
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05G218**

METHOD 200.7
METALS BY ICP-AES

Six (6) water samples were received on 07/26/05 for Metals analysis by Method 200.7 in accordance with "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods", SW846, 3rd edition.

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Serial Dilution / Post-Analytical Spike

Sample G183-07 from another SDG was analyzed for serial dilution and post-analytical spike. All QC requirements were met.

5. Matrix Spike/Matrix Spike Duplicate

No MS/MSD sample was designated in this SDG.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05G218**

METHOD 300.0
ANIONS

Six (6) water samples were received on 07/26/05 for Chloride, Nitrate-N, Nitrite-N and Sulfate analyses by method 300.0 in accordance with "Method for Determination of Inorganic Anions by Ion Chromatography", EPA 600/84-017.

1. Holding Time

Analyses met holding time criteria.

2. Method Blank

Method blanks were free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limits.

4. Duplicate

Sample G218-02 was analyzed for duplicate. %RPDs were within QC limit.

5. Matrix Spike

Sample G218-02 was spiked. Recoveries were within QC limit.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

Nitrate-N and Nitrite-N results were reported as Nitrogen concentration.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05G218**

METHOD 310.1
TOTAL ALKALINITY

Six (6) water samples were received on 07/26/05 for Total Alkalinity analysis by Method 310.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

Duplicate sample was not designated in this SDG.

5. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05G218**

METHOD 120.1
SPECIFIC CONDUCTIVITY

Six (6) water samples were received on 07/26/05 for Specific Conductivity analysis by Method 120.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

Sample G218-05 was analyzed for duplicate. %RPD was within QC limit.

5. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05G218**

METHOD 160.1
TOTAL DISSOLVED SOLIDS

Six (6) water samples were received on 07/26/05 for Total Dissolved Solids analysis by Method 160.1in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

Sample G218-06 was analyzed for duplicate. %RPD was within QC limit.

5. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05G218**

METHOD 376.1
SULFIDE

Six (6) water samples were received on 07/26/05 for Sulfide analysis by Method 376.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

Duplicate sample was not designated in this SDG.

5. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

METHOD 415.1
DISSOLVED ORGANIC CARBON

Six (6) water samples were received on 07/26/05 for Dissolved Organic Carbon analysis by Method 415.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blanks were free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

Sample G218-06 was analyzed for Duplicate. % RPD was slightly bias high.

5. Matrix Spike

Sample G218-06 was spiked. % Recovery was within QC limit.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

Subject: RE: COC for samples received on 8/2 SDG: 05H006 (Battelle/JPL)

Hanh,

For the MW-25 samples (MW-25-1, MW-25-2, MW-25-3, MW-25-4, MW-25-5, Dupe-4-7/26/05) please analyze the rest of the parameters on the COCs. But FIRST be sure to check whether the rest of the analytes are out of hold time, it they are let me know before you analyze, so we can figure out what to do.

As for the metals sample for MW-20-1, please confirm that MW-20-1 is the only location where the metal sample was collected in the wrong bottle. If this is the case, than please don't analyze the metals (Method 200.7 for Ca, Fe, Mg, K, Na) for MW-20-1. We will re-sample the metals for MW-20-1. But do analyze all other parameters on the COC for MW-20-1.

Please give me a call if you have any questions.

Thanks and hope to hear from you soon.

Tien

Subject: RE: COC for samples received on 8/2 SDG: 05H006 (Battelle/JPL)

Tien,
Yes, it will affect the metals result. It should be preserved with HNO3 instead of H2SO4 as we received. Thus, we will get some sample from bottle with no preservation to analyze Metal (only sample MW-20-1).

We received your email on 8/1, and chemist already analyzed on 7/29 for Nitrate and Nitrite.
All analysis of this SDG 05G260 were on hold now. Please let me know about that.
Best regards,
Hanh

Thanks for your patience,
Tien

Also, for the COC that you just attached, what does the discrepancy for MW-20-1 mean and will it affect the sample result?

Other than the discrepancy, the COC looks good.

Thanks,
Tien

Subject: COC for samples received on 8/2 SDG: 05H006 (Battelle/JPL)

Hi Tien,
Here is the COC for samples we received today. Do you want to change something, please let me know.

However, chemist already analyzed Nitrate/Nitrite for these samples MW-21- (out of holding time, SDG 05G260, sampled on 7/29). We will charge for that. If you have any question, please feel free to contact with Kam, thanks.
Hanh

Hahn,

I really hate to do this to you but can you hold of discarding the samples? I need to confirm whether we will be re-sampling all the anions or re-sampling all the geochemical parameters on the COCs.

Sorry for the trouble,
Tien

Hi Tien,
All analysis will be cancelled for samples received on 7/29. Thanks for your information.

Hanh

Hahn,

We're going to re-sample MW-21.

MW-21-5
MW-21-4
MW-21-3
MW-21-2
MW-21-1
Dupe-4-7/26/2005

Therefore, please don't analyze any of the samples you received 07/29.

Let me know if you have any questions. Thank you for your patience.

Hi Tien,
Please give me advise for discrepancy the samples we received today. Anions samples are out of holding time, thanks.

Tien,
Sulfide is out of holding time too. Could you please re-samples next time. Thus, we will cancel Nitrate/Nitrite, TDS, and sulfide for samples MW-21-.....on 7/26. I send the login review sheet later, thanks.
Hanh

Hi Tien,
For samples MW-21-5, -4, -3, -2, -1, and Dupe-4-7/26/05 sampled on 7/26, all TDS samples are out of holding time now (7 days HT for TDS). Thus, can you re-sample those next time with Nitrate/nitrite? Please let me know. Sorry about that. Thanks
Hanh

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL.
N		Indicates presumptive evidence of a compound.
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level.
E	J	Indicates that the result is above the maximum calibration range.
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05G260**

METHOD 200.7
METALS BY ICP

Six (6) water samples were received on 07/29/05 for Metals analysis by Method 200.7 in accordance with "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods", SW846, 3rd edition.

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blanks were free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Serial Dilution / Post-Analytical Spike

Sample G260-06 was analyzed for serial dilution and post-analytical spike. All QC requirements were met.

5. Matrix Spike/Matrix Spike Duplicate

Sample G260-06 was spiked. All recoveries were within QC limit.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05G260**

METHOD 310.1
TOTAL ALKALINITY

Six (6) water samples were received on 07/29/05 for Total Alkalinity analysis by Method 310.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

Sample G260-01 was analyzed for duplicate. %RPD was within QC limit.

5. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05G260**

METHOD 350.2
AMMONIA (NH3-N)

Six (6) water samples were received on 07/29/05 for Ammonia analysis by Method 350.2 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. **Holding Time**

   Analysis met holding time criteria.

2. **Method Blank**

   Method blank was free of contamination at the reporting limit.

3. **Lab Control Sample/Lab Control Sample Duplicate**

   Lab control results were within QC limit.

4. **Duplicate**

   Duplicate sample was not designated in this SDG.

5. **Matrix Spike**

   MS sample was not designated in this SDG.

6. **Sample Analysis**

   Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05G260**

METHOD 120.1
SPECIFIC CONDUCTIVITY

Six (6) water samples were received on 07/29/05 for Specific Conductivity analysis by Method 120.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

3. Duplicate

Sample G260-05 was analyzed for duplicate. %RPD was within QC limit.

4. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05G260**

METHOD 351.3
TKN

Six (6) water samples were received on 07/29/05 for TKN analysis by Method 351.3 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

Sample G260-05 was analyzed for duplicate. %RPD was within QC limit.

5. Matrix Spike

Sample G260-05 was spiked. %Recovery was within QC limit.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

PROJECT: **JPL**

SDG: **05G260**

METHOD 415.1
TOTAL ORGANIC CARBON

Six (6) water samples were received on 07/29/05 for Total Organic Carbon analysis by Method 415.1 in accordance with "Test Methods for Evaluating Solid Waste, Physical/Chemical Method", SW846, 3rd edition.

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

Sample G260-06 was analyzed for Duplicate. % RPD was within QC limit.

5. Matrix Spike

Sample G260-06 was spiked. % Recovery was within QC limit.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

Hanh Bui

From: Shiao, Tien [shiaoh@BATTELLE.ORG]
Sent: Wednesday, August 03, 2005 6:56 AM
To: Hanh Bui
Cc: Ohart, Carolyn J; Conner, David J
Subject: RE: COC for samples received on 8/2 SDG: 05H006 (Battelle/JPL)

Hanh,

For the MW-25 samples (MW-25-1, MW-25-2, MW-25-3, MW-25-4, MW-25-5, Dupe-4-7/26/05) please analyze the rest of the parameters on the COCs. But FIRST be sure to check whether the rest of the analytes are out of hold time, it they are let me know before you analyze, so we can figure out what to do.

As for the metals sample for MW-20-1, please confirm that MW-20-1 is the only location where the metal sample was collected in the wrong bottle. If this is the case, than please don't analyze the metals (Method 200.7 for Ca, Fe, Mg, K, Na) for MW-20-1. We will re-sample the metals for MW-20-1. But do analyze all other parameters on the COC for MW-20-1.

Please give me a call if you have any questions.

Thanks and hope to hear from you soon.

Tien

From: Hanh Bui [mailto:HDBui@emaxlabs.com]

To: Shiao, Tien
Subject: RE: COC for samples received on 8/2 SDG: 05H006 (Battelle/JPL)

Tien,
Yes, it will affect the metals result. It should be preserved with HNO3 instead of H2SO4 as we received. Thus, we will get some sample from bottle with no preservation to analyze Metal (only sample MW-20-1).

We received your email on 8/1, and chemist already analyzed on 7/29 for Nitrate and Nitrite.
All analysis of this SDG 05G260 were on hold now. Please let me know about that.
Best regards,
Hanh

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL.
N		Indicates presumptive evidence of a compound.
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level.
E	J	Indicates that the result is above the maximum calibration range.
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05H006**

METHOD 200.7
METALS BY ICP-AES

Four (4) water samples were received on 08/02/05 for Metals analysis by Method 200.7 in accordance with "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods", SW846, 3rd edition.

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Serial Dilution / Post-Analytical Spike

Sample H006-01 was analyzed for serial dilution and post-analytical spike. All QC requirements were met.

5. Matrix Spike/Matrix Spike Duplicate

No MS/MSD sample was designated in this SDG.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

WET CHEMICAL ANALYSES

SDG#: 05H006

8000

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05H006**

METHOD 310.1
TOTAL ALKALINITY

Five (5) water samples were received on 08/02/05 for Total Alkalinity analysis by Method 310.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

Duplicate sample was not designated in this SDG.

5. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

METHOD 350.2
AMMONIA (NH3-N)

Five (5) water samples were received on 08/02/05 for Ammonia analysis by Method 350.2 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

Duplicate sample was not designated in this SDG.

5. Matrix Spike

MS sample was not designated in this SDG.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

All results were reported as Nitrogen concentration.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05H006**

METHOD 300.0
ANIONS

Five (5) water samples were received on 08/02/05 for Chloride, Nitrate-N, Nitrite-N and Sulfate analyses by method 300.0 in accordance with "Method for Determination of Inorganic Anions by Ion Chromatography", EPA 600/84-017.

1. Holding Time

Analyses met holding time criteria.

2. Method Blank

Method blanks were free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limits.

4. Duplicate

No duplicate sample was designated in this SDG.

5. Matrix Spike

No MS sample was not designated in this SDG.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

Nitrate-N and Nitrite-N results were reported as Nitrogen concentration.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05H006**

METHOD 120.1
SPECIFIC CONDUCTIVITY

Five (5) water samples were received on 08/02/05 for Specific Conductivity analysis by Method 120.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

No duplicate sample was designated in this SDG.

5. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

METHOD 160.1
TOTAL DISSOLVED SOLIDS

Five (5) water samples were received on 08/02/05 for Total Dissolved Solids analysis by Method 160.1in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. **Holding Time**

   Analysis met holding time criteria.

2. **Method Blank**

   Method blank was free of contamination at the reporting limit.

3. **Lab Control Sample/Lab Control Sample Duplicate**

   Lab control results were within QC limit.

4. **Duplicate**

   Sample H006-01 was analyzed for duplicate. %RPD was within QC limit.

5. **Sample Analysis**

   Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05H006**

METHOD 351.3
TKN

Five (5) water samples were received on 08/02/05 for TKN analysis by Method 351.3 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. **Holding Time**

   Analysis met holding time criteria.

2. **Method Blank**

   Method blank was free of contamination at the reporting limit.

3. **Lab Control Sample/Lab Control Sample Duplicate**

   Lab control results were within QC limit.

4. **Duplicate**

   Duplicate sample was not designated in this SDG.

5. **Matrix Spike**

   MS sample was not designated in this SDG.

6. **Sample Analysis**

   Samples were analyzed according to the prescribed QC procedures. All criteria were met.

   All results were reported as Nitrogen concentration.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05H006**

METHOD 415.1
DISSOLVED ORGANIC CARBON

Five (5) water samples were received on 08/02/05 for Dissolved Organic Carbon analysis by Method SW9060 in accordance with "Test Methods for Evaluating Solid Waste, Physical/Chemical Method", SW846, 3rd edition.

1. **Holding Time**

   Analysis met holding time criteria.

2. **Method Blank**

   Method blank was free of contamination at the reporting limit.

3. **Lab Control Sample/Lab Control Sample Duplicate**

   Lab control results were within QC limit.

4. **Duplicate**

   No Duplicate sample was designated in this SDG.

5. **Matrix Spike**

   No MS sample was designated in this SDG.

6. **Sample Analysis**

   Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05H006**

METHOD 415.1
TOTAL ORGANIC CARBON

Five (5) water samples were received on 08/02/05 for Total Organic Carbon analysis by Method SW9060 in accordance with "Test Methods for Evaluating Solid Waste, Physical/Chemical Method", SW846, 3rd edition.

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

Sample H006-05 was analyzed for Duplicate. % RPD was within QC limit.

5. Matrix Spike

Sample H006-05 was spiked. % Recovery was within QC limit.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL.
N		Indicates presumptive evidence of a compound.
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level.
E	J	Indicates that the result is above the maximum calibration range.
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05G183**

METHOD 200.7
METALS BY ICP-AES

Seven (7) water samples were received on 07/22/05 for Metals analysis by Method 200.7 in accordance with "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods", SW846, 3rd edition.

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Serial Dilution / Post-Analytical Spike

Sample G183-07 was analyzed for serial dilution and post-analytical spike. All QC requirements were met.

5. Matrix Spike/Matrix Spike Duplicate

Sample G183-07 was spiked. All recoveries were within QC limit.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

LABORATORY REPORT FOR

BATTELLE MEMORIAL INSTITUTE

JPL

WET CHEMICAL ANALYSES

SDG#: 05G183

8000

CASE NARRATIVE

CLIENT: **BATTELL MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05G183**

METHOD 300.0
ANIONS

Seven (7) water samples were received on 07/22/05 for Chloride, Nitrate-N, Nitrite-N and Sulfate analyses by method 300.0 in accordance with "Method for Determination of Inorganic Anions by Ion Chromatography", EPA 600/84-017.

1. Holding Time

Analyses met holding time criteria.

2. Method Blank

Method blanks were free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limits.

4. Duplicate

Sample G183-03 was analyzed for duplicate. %RPDs were within QC limit.

5. Matrix Spike

Sample G183-03 was spiked. Recoveries were within QC limit except Chloride was out of the limit.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met with the aforementioned exception.

Two DCCS associated with Nitrate-N and Nitrite-N were bias high. The samples were not reanalyzed due to holding time criteria.

Nitrate/Nitrite-N were reported as Nitrogen concentration.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05G183**

METHOD 350.2
AMMONIA (NH3-N)

Seven (7) water samples were received on 07/22/05 for Ammonia analysis by Method 350.2 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

No duplicate sample was designated in this SDG.

5. Matrix Spike

No MS sample was designated in this SDG.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

All results were reported as Nitrogen concentration.

METHOD 350.2

PROJECT: **JPL**

SDG: **05G183**

SM3500
FERROUS IRON

Seven (7) water samples were received on 07/22/05 for Ferrous Iron analysis by Method SM3500 in accordance with "Standard Methods for the Examination of Water and Wastewater", 18th edition (1990).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample

Lab control result was within QC limit.

4. Duplicate

Sample G183-07 was analyzed for duplicate. %RPD was within QC limit.

5. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05G183**

METHOD 120.1
SPECIFIC CONDUCTIVITY

Seven (7) water samples were received on 07/22/05 for Specific Conductivity analysis by Method 120.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Duplicate

Sample G183-07 was analyzed for duplicate. %RPD was within QC limit.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05G183**

METHOD 160.1
TOTAL DISSOLVED SOLIDS

Seven (7) water samples were received on 07/22/05 for Total Dissolved Solids analysis by Method 160.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

No duplicate sample was designated in this SDG.

5. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

METHOD 351.3
TKN

Seven (7) water samples were received on 07/22/05 for TKN analysis by Method 351.3 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

No duplicate sample was designated in this SDG.

5. Matrix Spiked

No MS sample was designated in this SDG.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

All results were reported as Nitrogen concentration.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05G183**

METHOD 415.1
DOC

Seven (7) water samples were received on 07/22/05 for DOC analysis by Method 415.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

No duplicate sample was designated in this SDG.

5. Matrix Spike

No MS sample was designated in this SDG.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

Hanh Bui

From: Shiao, Tien [shiaoh@BATTELLE.ORG]
Sent: Monday, July 25, 2005 6:09 AM
To: Hanh Bui
Cc: Fields, Keith A; Ohart, Carolyn J; Conner, David J
Subject: RE: COC for samples received on 7/20 SDG: 05G145 (Battelle/JPL)

Hi Hanh,

Below is the address and GW sampling contact for APC labs:

Eric Wendland
Manager, Laboratory Services
Applied Physics and Chemistry Laboratory 13760 Magnolia Ave.
Chino, CA 91710

909-590-1828 x104
email: ericw@apclab.com

When sending the samples, send to **Sample Receiving.**

Our FedEx number is: 04320127-1.

Please send the perchlorate samples (125 mL each) for MW-19 -4, MW-19-4-dupe-1, MW-18-2, and MW-18-2-dupe-2 to APC labs. There should be **4** bottles total. Wait until MW-18-2 is received before sending all 4 bottles together and let me know the date the bottles are sent.

MW-19 -4 & MW-19-4-dupe-1 were sent to EMAX by FedEx on Wed 07/20/05 and MW-18-2 & MW-18-2-dupe-2 were sent to EMAX by FedEx on Fri 07/22/05.

Thanks for your help!
Tien

Subject: RE: COC for samples received on 7/20 SDG: 05G145 (Battelle/JPL)

Hi Tien,
I just checked the bottles of all Perchlorate. On labels of all 500mL HDPE bottles were shown Perchlorate/Ferrous Iron/Anion (Nitrate/Nitrite/Chloride/Sulfate)/TDS/ Alkalinity/Specific Conductivity. Could you please give us the information of the other lab to send 125mL Perchlorate samples, and the FedEx # too. We will ship these samples on Monday 7/25, thanks.
Hanh

Hanh,

Thanks for checking. Yes we will need the perchlorate results for the sample ID DUPE-1-7/20/05.

Tien

Subject: RE: COC for samples received on 7/20 SDG: 05G145 (Battelle/JPL)

Hi Tien,
We will cancel Perchlorate analysis for all samples MW-19- and MW-25- ..... on COC. Thus, there is one sample ID
DUPE-1-7/20/05 11:15 still requested for perchlorate, isn't it? Please let me know, thanks.
Hanh

REPORTING CONVENTIONS

DATA QUALIFIERS:

Lab Qualifier	AFCEE Qualifier	Description
J	F	Indicates that the analyte is positively identified and the result is less than RL but greater than MDL.
N		Indicates presumptive evidence of a compound.
B	B	Indicates that the analyte is found in the associated method blank as well as in the sample at above QC level.
E	J	Indicates that the result is above the maximum calibration range.
*	*	Out of QC limit.

Note: The above qualifiers are used to flag the results unless the project requires a different set of qualification criteria.

ACRONYMS AND ABBREVIATIONS:

CRDL	Contract Required Detection Limit
RL	Reporting Limit
MRL	Method Reporting Limit
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
DO	Diluted out

DATES

The date and time information for leaching and preparation reflect the beginning date and time of the procedure unless the method, protocol, or project specifically requires otherwise.

PROJECT: **JPL**

SDG: **05G145**

METHOD 200.7
METALS BY ICP

Ten (10) water samples were received on 07/20/05 for Metals analysis by Method 200.7 in accordance with "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods", SW846, 3rd edition.

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blanks were free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Serial Dilution / Post-Analytical Spike

Sample G145-10 was analyzed for serial dilution and post-analytical spike. All QC requirements were met.

5. Matrix Spike/Matrix Spike Duplicate

Sample G145-10 was spiked. All recoveries were within QC limit.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05G145**

METHOD 300.0
ANIONS

Ten (10) water samples were received on 07/20/05 for Chloride, Nitrate-N, Nitrite-N and Sulfate analyses by method 300.0 in accordance with "Method for Determination of Inorganic Anions by Ion Chromatography", EPA 600/84-017.

1. Holding Time

Analyses met holding time criteria.

2. Method Blank

Method blanks were free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limits.

4. Duplicate

Sample G145-02 was analyzed for duplicate. %RPDs were within QC limit.

5. Matrix Spike

Sample G145-02 was spiked. Recoveries were within QC limit.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

All results were reported as Nitrogen concentration.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05G145**

METHOD 310.1
TOTAL ALKALINITY

Ten (10) water samples were received on 07/20/05 for Total Alkalinity analysis by Method 310.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

Duplicate sample was not designated in this SDG.

5. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05G145**

METHOD 120.1
SPECIFIC CONDUCTIVITY

Ten (10) water samples were received on 07/20/05 for Specific Conductivity analysis by Method 120.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Duplicate

Duplicate sample was not designated in this SDG.

3. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

SDG: **05G145**

SM3500
FERROUS IRON

Ten (10) water samples were received on 07/20/05 for Ferrous Iron analysis by Method SM3500 in accordance with "Standard Methods for the Examination of Water and Wastewater", 18th edition (1990).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample

Lab control result was within QC limit.

4. Duplicate

Sample G145-01 was analyzed for duplicate. %RPD was within QC limit.

5. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05G145**

METHOD 160.1
TOTAL DISSOLVED SOLIDS

Ten (10) water samples were received on 07/20/05 for Total Dissolved Solids analysis by Method 160.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

Sample G145-10 was analyzed for duplicate. %RPD was within QC limit.

5. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

CASE NARRATIVE

CLIENT: **BATTELLE MEMORIAL INSTITUTE**

PROJECT: **JPL**

SDG: **05G145**

METHOD 415.1
DOC

Ten (10) water samples were received on 07/20/05 for DOC analysis by Method 415.1 in accordance with "Method for Chemical Analysis of Water and Wastewater", EPA 600/4-79-020 (1983).

1. Holding Time

Analysis met holding time criteria.

2. Method Blank

Method blank was free of contamination at the reporting limit.

3. Lab Control Sample/Lab Control Sample Duplicate

Lab control results were within QC limit.

4. Duplicate

Sample G145-10 was analyzed for duplicate. %RPD was within QC limit.

5. Matrix Spike

Sample G145-10 was spiked. Recovery was within QC limit.

6. Sample Analysis

Samples were analyzed according to the prescribed QC procedures. All criteria were met.

SEE ATTACHED INSTRUMENT SEQ.
7/31/05

ANALYTICAL BATCH * TC6021 ** TC6022

Instrument No.	62
INITIAL CALIBRATION REFERENCE	
Method File	TC6021
ICAL ID	SW10B-01-605
ICV ID	↓ -606

STANDARDS

ICAL Level		Conc.(mg/L)
S_0	Nanopure	0
S_1	SW10B-01-605	1
S_2	↓	5
S_3		10
S_4		25
S_5		50
S_6		7/31/05
ICV/LCS	SW10B-01-606	25
CCV	↓ 607	25
